

Book Sewing & Folding Machine

Book Central Threading Folding Machine, is special used for making central threading style books. This is a new machine in the market, and it could instead of Saddle Stitching Machine to binding notebooks, exercises books ,account books, etc. It can thread very thick books easily with high production capacity, fast speed and stable performance.

It is with multi functions online : Manual book feeding, automatic central sewing ,automatic thread cutting, automatic folding, and automatic book pressing. It is the ideal and first-choice equipment for mass production in paper stationary products factories.

Special Features

- Working speed: 800-1800 books per hour.
- Sewing pitch can adjustable for the paper.
- Suitable for notebook, manual, exercise book etc, sewing style binding. 4 Simple operation and easy to learn.
- Sewing wire can automatically cutting between books.
- Machine used the high sensitivity optical fibre sensor, automatic sewing without manual step On/Off.
- Books sewing and folding once completed.
- Machine running much higher speed than traditional labour . Much lower cost and much stable stitching .

Book Sewing & Folding Machine

BOOK CENTRAL THREADING FOLDING

TECHNICAL DATA

Speed	800-1800 books/hour (double the output of duplex)
Max size	450mm (spreading width) X 575mm(length)
Min size	200mm (spreading width) X 150mm(length)
Max binding thickness	4mm (4-150 pages basic on the 70gsm paper)
Air compressor (Customer's own)	2.2KW or above
Power supply / Total power	380V / 3.KW
Air pressure	6-8 pa
Dimension (LxWxH)	2830 X 1850 X 1580mm
Net weight	650kg
